**Civilian & Military
Camouflage Patterns**

Matthew Dermody

INTRODUCTION

Camouflage patterns are quickly evolving. This free compilation is designed to help you search for the most effective camouflage pattern for your camouflage and concealment needs. All the following camo pattern swatches are presented without bias, criticism, or endorsement. I have not included any of the non-typical/non-subdued base color camouflage patterns (i.e. pink or purple) or patterns that contain overt novelty shapes that do not serve a true camouflage and concealment purpose. The blaze orange camouflage patterns are the exception, as they are required in most states for hunting many big game species. Also included are a few nautical blue patterns, even though their use would be very limited.

As new camouflage patterns are developed and released into the commercial market, I add the swatches to this booklet. If you are aware of a certain camouflage pattern that is not shown, please feel free to contact me via email with your pattern submission and I will add it to the collection.

One thing to remember, if you cannot see the detail of the camouflage pattern as well as you would like, try searching for the pattern on the Internet to get a better view. Some of the camouflage patterns listed are cropped to fit and/or to remove watermarks that may reduce the image quality.

It should also be noted that several of the patterns contained within this compilation are no longer in production at any level. You may find new-old stock apparel at garage sales, estate sales, gun shows, and online auction sites like eBay. Do not overlook fabric stores or textile warehouses, as they may have bulk over-runs or remnants.

This is not an exhaustive list of all past and existing camouflage patterns. All patterns are property of their respective copyright and registered trademark holders. Some patterns may not be available to civilians or no longer in production. There are also many patterns designed by artists that only have a virtual existence on the Internet and have not been made commercially available.
